Subject: Strong Support Across Multiple Senate Battleground States for Bipartisan Proposal to Secure the Border

Date: May 23, 2024

A new Public Policy Polling survey finds that an overwhelming majority (80%) of voters from Arizona, Florida, Michigan, Montana, Nevada, Ohio, Pennsylvania, Texas, and Wisconsin support a bipartisan proposal in Congress to secure the border, with only 8% opposing this proposal. This is consistent across party lines – a large majority of Democrats (74%), Republicans (83%), and independents (82%) would support this proposal.

53% of voters (including 51% of Republicans and 58% of independents) would be less likely to support a candidate for U.S. Senate who opposed a bipartisan border security proposal that would crack down on fentanyl trafficking from China and Mexico; only 19% would be more likely to vote for this candidate.

54% of voters (including 57% of Republicans and 53% of independents) would be less likely to support a candidate for U.S. Senate who opposed a bipartisan border security proposal that was supported by border patrol agents, with 16% being more likely to support them.

PPP surveyed 642 registered voters from Arizona, Florida, Michigan, Montana, Nevada, Ohio, Pennsylvania, Texas, and Wisconsin from May 21-22, 2024. The margin of error is +/-3.9%. 77% of interviews for the survey were conducted by text message and 23% by telephone.
